Counting Leaves to the Numbers

Directions

Print all pages on card stock. Laminate and cut out the circles and all the leaves. Circles can be used as they are or they can be glued to sturdy paper plates. Child will pick a number and count out the number of leaves for each number. There are 105 leaves. Suggestion would be to start with numbers 1-10 and when proficient work on 11-20. Place label on the Zip-Lock Bag for storage. A larger bag will be needed if plates are used.
